

Transcript – Introduction and Welcome

Hello, and welcome to the Introduction to the Revised Mathematics TEKS, grades 9 through 12, Module 1. I will be your guide as we explore the changes made in 2012 to the high school mathematics Texas Essential Knowledge and Skills, or TEKS.

The goals of this module are to become familiar with the Revised Math TEKS and Side-by-Side documents and determine how they relate to the current TEKS. We will explore a vertical alignment document to give us a sense of what students have learned, what they are learning, and what they will be learning as they progress through mathematics courses in different grade levels. And we will examine how we can use the documents to improve overall mathematics instruction in the classroom.

Throughout this course you will have the opportunity to study documents referenced in the videos and record your thoughts in the journal provided. You can download the interactive journal PDF and add your notes to the document. It can be saved to your desktop, and you can return to it as needed throughout the course. Of course, you may also print this document if you prefer.
