

Transcript – Potential Perks and Pitfalls

After exploring the document on your own, please understand that this document was designed with an “end in mind” view, or a backward design. You will look at the student expectations before the key concepts and procedures, and see how the expectations build the progression of ideas toward the key concepts and procedures. Please note that this is not a comprehensive listing of the TEKS, nor does it imply a scope and sequence. Take time now to review *A Vertical Look – Potential Perks and Pitfalls*.

The vertical look document is not intended to answer all questions, but to provide a quick glance at the progress of concepts in the TEKS. It can be used to help identify students who are struggling, what gaps may exist, what experiences students are entering your course with, and what is next for a given concept.
