

## Transcript – Introduction & Welcome

Hi, my name is Belinda Rendon. I'm from Region 4; I'm an Education Specialist. We will be looking at four different modules. Right now, we will be looking at the Focal Points and TEKS Comparison for the Revised TEKS for Mathematics (2012).

The Texas Education Agency has provided professional development for us as we move into the newly revised TEKS. We are looking today at the Focal Points and TEKS Comparison module. There are three additional modules for the introduction of the Revised TEKS, which include the Mathematical Process Standards, the Gap Analysis, and Fluency and Proficiency.

Through Project Share, there are additional modules available, which include two process standard modules and three content standard modules.

Our goals for participation are to become familiar with the focal points and the TEKS comparison documents. We will also examine how to use the documents to improve overall mathematics instruction. Lastly, we will explore vertical alignment of mathematical concepts and processes within the Revised TEKS (2012).
