

Transcript – Pulling it All Together

Now that we've completed the Focal Points and TEKS Comparison module, we should be more familiar with the Focal Points and TEKS Comparison documents. We've examined how to use the documents to improve overall mathematics instruction and we've explored vertical alignment of mathematical concepts and processes within the revised TEKS.

Thank you for going through this module with us today. We hope you will implement these processes and strategies as you endeavor to learn the revised TEKS. You may continue your professional development by accessing the other modules in the Introduction to the Revised Mathematics TEKS (2012) series.
