Exploring The Mathematical Process Standards (continued)

How do the new mathematical process standards compare to the current mathematical process standards?

Vocabulary Notes

сī

| ELPS | Instruction | Multiple Entry Points | Levels of Cognitive Demand |
|---|--|---|--|
| The English Language Proficiency This Standards (ELPS) outline the cut at instruction school districts must (English provide to English language learners scient in order for them to have full stand to learn CCF English and to learn The academically. The ELPS are to be The implemented as an integral part of the The isstruction in each | his term refers to skills and processes that ut across disciplines English/language arts, reading, math, cience, and social studies). Related andards are found in the CRS he CCRS (College and Career Readiness tandards) includes the and Standards and a resource designed to help students, arents, teachers, and counselors nderstand the specific skills ecessary for college and career readiness. he cross-disciplinary standards are rganized into two major areas: Key Skills and Skills. | Tasks with entry points are those which have varying degrees of within the task, or provide students with varied, and to actively participate in the task. | Tasks that command engagement with the concepts and that encourage students to make connections leading to different opportunities for student thinking, such as tasks, procedures to connections tasks, procedures connections tasks, and mathematics tasks. |

Examining Amplified Instructional Task 1

Task: _____

| | | Communication | Reasoning, Generalizing, and Problem Solving | Modeling, Using Tools, and Connecting Representations | Analysis |
|---------------|---|---------------|---|---|----------|
| al Strategies | English Language Proficiency Standards | | | | |
| Instructions | Multiple Entry Points | | | | |
| CCRS | Cross- Disciplinary | | | | |

Mark your perceived level of cognitive demand for this task on the continuum below:

Low

High

Examining Amplified Instructional Task 2

Task: _____

| | | Communication | Reasoning, Generalizing, and Problem Solving | Modeling, Using Tools, and Connecting Representations | Analysis |
|---------------|---|---------------|---|---|----------|
| al Strategies | English Language Proficiency Standards | | | | |
| Instructions | Multiple Entry Points | | | | |
| CCRS | Cross- Disciplinary | | | | |

Mark your perceived level of cognitive demand for this task on the continuum below:

. Low High

Amplifying Instructional Tasks Brainstorming – Kindergarten Example

| | | Considerations for Brainstorming | | |
|----------------------|---|---|--|---|
| | Consider the 2012 TEKS in the Original Task | Consider the Curriculum Focal Point | Consider the Context | Consider the Student |
| Guiding Questions | What main concepts and/or skills are involved in this task? What are related concepts and/or skills? | What else might be explored or applied? Additional mathematical ideas from the focal points Grade level connections Financial literacy standards | What else could be explored within this context? What related ideas could be added to this context? What connections could be made to other content areas? | What Tier I differentiation may be needed to reach the student who is struggling, learning English, and/or advanced? |
| Brainstorming | Main Concepts and/or Skills Use comparative language to describe two numbers up to 20 presented as written numerals K(2)(H) Related Concepts and/or Skills Compare sets of objects up to at least 20 in each set using comparative language K(2)(G) | Standards Mathematical process standards K(1)(A)-(G) Generate a number that is one more than or one less than another number up to at least 20 K(2)(F) Compare sets of objects up to at least 20 in each set using comparative language K(2)(G) Generate a set using concrete and pictorial models that represent a number that is more than, less than, and equal to a given number up to 20 K(2)(E) Draw conclusions from real- objects and picture graphs K(8)(C) | Context Comparing the number of each color of bears in a bag (red compared to blue) Counting the number of students in each kindergarten classroom and make comparative statements Collecting data and creating a real-object or picture graph, then make comparative statements about the data | Struggling Use manipulatives Provide counting strips when counting forward and backwards Learning English Use sentence frames Word cards Advanced Determine a number between two given whole numbers |

Amplifying Instructional Tasks Brainstorming – Grade 1 Example

| | | Considerations for Brainstorming | | |
|----------------------|--|--|---|---|
| | Consider the 2012 TEKS in the Original Task | Consider the Curriculum Focal Point | Consider the Context | Consider the Student |
| Guiding Questions | What main concepts and/or skills are involved in this task? What are related concepts and/or skills? | What else might be explored or applied? Additional mathematical ideas from the focal points Grade level connections Financial literacy standards | What else could be explored within this context? What related ideas could be added to this context? What connections could be made to other content areas? | What Tier I differentiation may be needed to reach the student who is struggling, learning English, and/or advanced? |
| Brainstorming | Main Concepts and/or Skills Identify U.S. coins by value and describe the relationships among them 1(4)(A) Related Concepts and/or Skills Mathematics in everyday life 1(1)(A) | Standards Mathematical process standards 1(1)(A)-(G) Write a number with the cent symbol to describe the value of a coin 1(4)(B) Use relationships to count by twos, fives, and tens to determine the value of a collection 1(4)(C) Represent the comparison of two numbers to 100 using the symbols >,<, or = 1(2)(G) Apply properties of operations to add and subtract two or three numbers 1(5)(G) Define money earned as income 1(9)(D) | Context Finding the total amount saved from allowance earned for chores Counting/totaling money earned selling lemonade Counting money to determine if there is enough to buy a candy bar Determining which person has the most change and represent the situation using comparison symbols | Struggling Provide a sorting mat Provide hint cards Learning English Use word cards Use sentence frames Advanced Use relationships between coins to create sets of coins with an equal value |

Amplifying Instructional Tasks Brainstorming – Grade 2 Example

| | | Considerations for Brainstorming | | |
|----------------------|---|---|---|---|
| | Consider the 2012 TEKS in the Original Task | Consider the Curriculum Focal Point | Consider the Context | Consider the Student |
| Guiding Questions | What main concepts and/or skills are involved in this task? What are related concepts and/or skills? | What else might be explored or applied? Additional mathematical ideas from the focal points Grade level connections Financial literacy standards | What else could be explored within this context? What related ideas could be added to this context? What connections could be made to other content areas? | What Tier I differentiation may be needed to reach the student who is struggling, learning English, and/or advanced? |
| storming | Main Concepts and/or Skills Solve one-step word problems with addition 2(4)(C) Related Concepts and/or Skills Mathematics in everyday life 2(1)(A) | Standards Process standards 2(1)(A)-(G) Add or subtract using mental strategies 2(4)(B) Solve one-step and <u>multi-step</u> word problems with addition and subtraction 2(4)(C) Generate and solve problem situations involving addition and subtraction 2(4)(D) Represent and solve word problems where unknowns may | How many students voted for their favorite flavor? Create a bar graph to represent the information. Compare quantities. Draw conclusions from the graph. | Struggling Provide scaffolding tools (graph). Provide checkpoints on multistep problems. Learning English Provide sentence stems and frames. Provide opportunities to speak. |
| Bra | | be any one of the terms 2(7)(C) Solve addition or subtraction problems from pictographs or bar graphs 2(10)(C) Draw conclusions and make predictions from a graph 2(10)(D) | | Advanced Extend problem to include more complex steps. Require students to analyze given information. |

| TEKS | Type of Activities | Do you see evidence of the mathematical process standards? Justify your answer. | Notes |
