GRADES 4 & 5

READING TO LEARN
ACADEMIES

GRADE 5

Using Assessment Data

Section Objectives

This section will enhance your knowledge of

- different types of data,

- their purposes, and

- how to use them effectively.

Questions to Address

- Why should we use assessment data in fifth grade?

- What kind of data should we use in fifth grade?

- How should we assess and use data in fifth grade?

- Are we using data effectively?

- What are our next steps?

Video: Using Assessment Data

As you watch the video, take notes related to the following questions:

- What do the teachers use their data for? How do the data affect their instruction?

- How do the teachers use data to differentiate their instruction?

- Which grouping formats do the teachers use?

- What kinds of activities do students participate in across the different grouping formats?

Why Should We Use Data?

Effective teachers "question themselves, they worry about which students are not making progress, they seek evidence of successes and gaps, and they seek help when they need it in their teaching."

— Hattie, 2012, p. 11

Systematic Use of Data

- Allows for comparisons across students, classrooms, and schools
- Allows teachers to design more effective instruction
- Supports teachers in differentiating instruction
- Improves student achievement

Systematic Use of Data (cont.)

- Allows educators to track student progress across time

- Helps teachers communicate with students and parents about progress

- Helps students take responsibility for their learning and progress

Using Data to Differentiate

- Modeling more examples
- Scaffolding more extensively
- Allowing for extended practice opportunities
- Providing immediate, corrective feedback related to the task, process, or strategies used
- Using various grouping formats

Instructional Grouping

Instructional Grouping

- Teacher-led small groups
- Heterogeneous, cooperative small groups (e.g., workstations)
- Partners
- Independent practice

Teacher-Led Small Groups

Can be used to target specific student needs, including the following:

- Students who struggle with a skill or concept
- Students who need enrichment to move beyond grade level
- Students who require more language support

Allow teachers to provide the following:

- More modeling
- More extensive scaffolding
- Extended practice opportunities
- Immediate feedback

Instructional Grouping

TEA
Texas Education Agency

Heterogeneous, Cooperative Small Groups and Partners

- Provide extended practice opportunities of previously taught skills with support from peers

- Give students the chance to scaffold and model strategies for one another

- Provide time for students to discuss strategies, thinking, and learning processes

- Foster oral language development, especially with academic language

Instructional Grouping

TEA
Texas Education Agency

Grouping: Lesson Plan

- On Handout 2, what do you notice about the small-group lessons? How do the plans change from group to group?

- What do you notice about the partner work versus workstations versus independent work?

- Why did the teacher write how much time he thinks the partner work, workstations, and independent work will take? Why might this be important to consider?

TEA
Texas Education Agency

Workstation Planning Form

- Objective, activity, and materials
- Differentiation to meet students' needs
- Student interaction
- Choice
- Student accountability (evidence of practice and learning)

TEA
Texas Education Agency

Partnering Students

- On Handout 4, why did the teacher divide the list in half (in Step 2) and move the halves next to each other (in Step 3)?

- Read Step 5. Do the teacher's decisions make sense? Why or why not?

- This example uses oral reading fluency data. What other kinds of data could you use to partner students?

TEA
Texas Education Agency

Independent Practice

- Should be provided after students demonstrate mastery in cooperative groups or with partners

- Allows teacher to assess student mastery of skills and concepts

- Helps students develop fluency and practice to automaticity

- Provides data related to student learning and progress, which can inform instructional adaptations and decisions

Instructional Grouping

What Data Should We Use…

…for All Fifth-Graders?

- Encoding (word spelling)
- Oral reading fluency
- Vocabulary
- Reading comprehension
- Writing

Encoding

- Students spell words with orthographic patterns that will be taught across the year.

- The teacher examines spelling errors.

TEA
Texas Education Agency

Oral Reading Fluency

- Students read a grade-level text while being timed (usually for a minute).

- The teacher follows along, marking words misread or skipped.

- Scores include accuracy (the percentage of words read correctly out of the total words read) and rate (the words correct per minute)

- Additional data come from analyzing a student's miscues, evaluating phrasing, and listening for prosodic elements.

TEA
Texas Education Agency

Vocabulary

- **Receptive vocabulary:** Students identify a picture (usually out of four) that matches a given word.

- **Expressive vocabulary:** Students name a picture of a person, object, or action or give the definition of a word.

- **Relational vocabulary:** Students tell how two or three words are alike.

- **General vocabulary:** Students give a synonym or antonym for a word, use a given word in a sentence, or orally fill in the blank in a sentence.

TEA
Texas Education Agency

Reading Comprehension

After reading a text, students do one of the following:

- Orally answer open-ended questions, both literal and inferential

- Answer multiple-choice questions

- Respond in writing to open-ended questions

- Retell a story or what was learned from an informational text

Students read a text and fill in blanks, using one of the following procedures:

- Maze: Answers are chosen from three options.

- Cloze: No choices are provided.

Data for All Students

TEA
Texas Education Agency

Writing

- Output
- Mechanics
- Vocabulary
- Sentence structure
- Organization of ideas
- Voice
- Genre (or text) elements

TEA
Texas Education Agency

What Data Should We Use…

…for Struggling Fifth-Graders?

- Phonemic awareness
- Decoding
- Grapheme-phoneme knowledge
- Sight-word knowledge
- Oral language
- Listening comprehension

TEA
Texas Education Agency

Phonemic Awareness

- Students blend, segment, or manipulate individual sounds in words.

- The teacher records students' correct and incorrect responses.

- The teacher examines the errors.

TEA
Texas Education Agency

Decoding

- Students read a list of nonsense, or make-believe, words.

- The assessment can be timed or untimed.

TEA
Texas Education Agency

Grapheme-Phoneme Knowledge

- Students say the sounds of a given list of letters and letter combinations.

- Students write the matching letter or letter combination(s) of an orally presented sound.

- Students read words with various orthographic patterns (e.g., closed syllables, vowel teams).

- These measures can be timed or untimed.

Data for Struggling Students

TEA
Texas Education Agency

Sight-Word Knowledge

- Students read a list of words.

- The list may include high-frequency words or words increasing in difficulty.

- These assessments can be timed or untimed.

TEA
Texas Education Agency

Oral Language

Sentence-level assessments

- Sentence memory: Students repeat sentences of increasing length.

- Sentence grammar: Students identify whether a sentence is spoken correctly.

- Sentence meaning: Students decide whether two spoken sentences have the same meaning.

Discourse-level assessments

Given a spoken question or statement, students point to a part of a picture or one of four pictures.

Data for Struggling Students

TEA
Texas Education Agency

Listening Comprehension

- Used to assess students who struggle with reading comprehension but do not demonstrate difficulties in decoding, word reading, or fluency

- Provides data similar to reading comprehension but removes the influence of word-reading ability

- Used to diagnose whether a student's comprehension problems stem from language or understanding difficulties or from word reading difficulties

How Should We Assess?

Assess across different literacy areas, including the following:

- Decoding and encoding
- Oral reading fluency
- Vocabulary and listening and reading comprehension
- Writing

Use reliable, valid assessments, including the following:

- Universal screening and benchmark measures
- Diagnostic measures
- Progress-monitoring measures
- Summative assessments
- Language assessments

Texas Education Agency

How Should We Assess? (cont.)

Universal Screening and Benchmark Measures

- Are quick to administer
- Are used with **all** students three to four times a year
- Assess grade-level performance
- Identify students on grade level and students at risk

Data Uses

- Examine whole-class needs
- Group students for targeted small-group instruction
- Examine individual students' strengths and needs

TEA
Texas Education Agency

Screening Data: Modeling

Class 1

Student	ELL?	Sp. Ed.?	Spelling		Oral Reading Fluency		Reading Comprehension

Ashley	N	Y	S	B	B	B	I	I

Activity Wrap-Up

- Did you find it difficult or easy to create instructional groups based on the data? Why?

- How often should you do this kind of data analysis and grouping? Why?

TEA
Texas Education Agency

Diagnostic Measures

- Give more in-depth information about each student's needs

- Show individual learning gaps

- Help you set goals that are more student-specific

- Allow for more precisely targeted instruction

TEA
Texas Education Agency

How Should We Use These Data?

- To identify specific student gaps
- To plan targeted instruction based on these gaps
- To set specific, achievable goals for individual students

Diagnostic Data: Fluency Analysis
- As you listen to the student read, mark errors you hear.

- Pay attention to other fluency elements like phrasing, prosody, and attending to punctuation.

- When the student finishes reading, use the checklist (on page 2) to mark observed patterns and summarize errors.

- Use the fluency rubric (on page 2) to assess expression, phrasing, smoothness, and pace.

- Calculate the student's accuracy score (percentage of words read correctly) and fluency score (words correct per minute).

Diagnostic Data: Retell Analysis

- As you listen to the retell, use the number chart (on page 3) to count words in the retell.

- Rate the quality of the retell using the four-point scale (on page 3).

Diagnostic Data: Analysis
Examine the student's data.

- How does the student's fluency score compare to the fluency norms we examined during the Fluency session?

- What strengths does the student demonstrate?

- What areas of need do you see for the student?

- How can these data inform your instruction?

Compare notes with those of your tablemates.

- Are your data similar?

- Do you see the same strengths and areas of need?

Diagnostic Data: Spelling Analysis

On a spelling inventory, instead of simply counting each spelling as right or wrong, examine students' spelling patterns.

- Which patterns has each student mastered?
- With which patterns does each student need more instruction and practice?

Use the data to group students and target word study and recognition instruction.

- Group students with like needs together.
- For patterns that more than half of the class needs support with, teach the whole group.

Progress-Monitoring Measures

- Are quick to administer
- Are used to monitor a student's growth in a specific area
- Assess grade-level and/or off-grade-level performance
- Provide data to adapt to and target students' learning strengths and needs

How Should We Use These Data?

- To examine students' current level of performance

- To examine students' progress across time

- To gauge movement toward goals and grade-level expectations

- To adapt instruction based on performance level and improvement level
- To set new learning goals

TEA
Texas Education Agency

Progress-Monitoring Data: Oral Reading Fluency

Emma
Yahir

Graphing Progress-Monitoring Data

Showing progress-monitoring data in a line graph helps you visualize a student's growth and determine whether instruction is truly accelerating learning.

Tool to Track Progress-Monitoring Data
http://buildingrti.utexas.org/instructional-materials/progress-monitoring-line-graph

Summative Assessment: State of Texas Assessments of Academic Readiness (STAAR)

- Is used at the end of instruction to measure mastery of end-of-year expectations
- Provides an overall gauge of student achievement related to grade-level content

TEA Texas Education Agency

How Should We Use These Data?

Examine data at the end of the year to find strengths and areas of need in relation to specific vocabulary and comprehension expectations

Combine these data with other data (decoding, spelling, and fluency screening data) to do the following:

- Analyze specific student needs across all reading and writing components
- Set annual goals to improve students' overall reading and writing abilities
- Plan instructional changes for the following year based on students' strengths and areas of need

Example: Using STAAR With Other Data

Students Scoring Advanced on STAAR			Students Scoring 70% to 85% on STAAR		Students Scoring 0% to 49% on STAAR		
n	EOY Oral Reading Fluency	Six Students' Scores	*n*	EOY Oral Reading Fluency	*n*	EOY Oral Reading Fluency	EOY Oral Reading Fluency
70	Six students (9%) read fewer than 125 WCPM	111, 114, 119, 120, 122, 124	249	14 students (6%) read fewer than 100 WCPM	146	75 students (51%) read fewer than 100 WCPM	126 students (86%) read fewer than 125 WCPM

What relationship do you see between fluency and comprehension? Why should you combine data from different assessments like these?

Texas Education Agency

Example: Using STAAR With Other Data

Students Scoring Advanced on STAAR			Students Scoring 70% to 85% on STAAR		Students Scoring 0% to 49% on STAAR		
n	EOY Oral Reading Fluency	Six Students' Scores	*n*	EOY Oral Reading Fluency	*n*	EOY Oral Reading Fluency	EOY Oral Reading Fluency
70	Six students (9%) read fewer than 125 WCPM	111, 114, 119, 120, 122, 124	249	14 students (6%) read fewer than 100 WCPM	146	75 students (51%) read fewer than 100 WCPM	126 students (86%) read fewer than 125 WCPM

What relationship do you see between fluency and comprehension? Why should you combine data from different assessments like these?

Example: Using STAAR With Other Data

Texas Education Agency

Assessing English Language Learners

- Use assessments that are reliable and valid with this student population.

- Identify reading abilities initially in both the native language and in English.

- Identify language strengths and needs.

TEA
Texas Education Agency

Language Assessment Data
Class 1

David	Y	N	Advanced	Advanced High	Advanced High	Intermediate
Rey	Y	N	Advanced	Advanced	Intermediate	Beginning

How Are We Doing?

Reflect on your current use of assessment data.

- Do you collect the right kinds of data?

- Do you use data for all of the purposes discussed in this session?

- Do you examine that data consistently?

- Do you make instructional decisions and adaptations based on your students' data?

Next Steps

What can you do to improve your use of assessment data? Write three steps you can take on Handout 14.

Remember

"If assessment is used for nothing more than sorting students, we will continue to achieve the results we have always gotten. These assessments are measures of our progress, too—but only if we choose to look closely at our impact."

— Fisher, Frey, & Hattie, 2016, pp. 166–167

The Reading Rope

How do these instructional practices benefit English language learners, struggling students, and gifted students?
Scarborough, 2001

My Synthesis and Summary

Three to four **example activities and lessons** you want to use

Three to four **workstation ideas**

Small Groups and Workstations

Two to three ideas you want to use with **struggling learners**

At least one scaffold you will provide to **English language learners** who need it
